Aadhar card mobile number registration form

By Hollan Johnson In most cases, it is impossible to choose your own mobile phone number from scratch. However, many mobile phone providers, such as Verizon Wireless and AT&T Wireless, which allows customers to choose mobile phone numbers from the list if they wish. You can also transfer your old mobile phone number to your new account in many cases as well. The only way to find out if you can choose your own mobile phone number is to contact your service provider. Call your service provider or go online to your service provider's website. If you want to change your service provider, contact your new service provider by visiting that service provider's website or call. Ask a representative if and how you can choose your own mobile number from a list of numbers. If it's a new service provider, ask how to change your service and select a number. Also ask if you can transfer your old phone number to your new service, if you wish. Sign in to your account on your website or create a new one. Select the new phone number you want from the list of available numbers. This article is part of a larger series on Payments.Mobile credit card processors that allow merchants to sell products and accept card payments from virtually anywhere with a smartphone or tablet. The best mobile credit card processor should be reliable, have an affordable transaction fee, come with a free business management app and work offline. Not sure which credit card processor is right for you? Take this four-question test to learn: Answer a few questions about your business, and we'll give you a personalized combination of products How we evaluate mobile credit card processing companies There are plenty of great mobile credit processing options, but there are a few highlights. The best mobile credit card processors are convenient and flexible with no or low up-cost up and competitive processing rates. It must also be reliable - you need to be able to depend on it in many different environments, even with an unstable internet connection. We value mobile credit card processors based on price, ease of use, POS app, reliability, and multi-channel features. Mobile credit card processing companies Compare Square: Best Overall Mobile Credit Card Processor Square is the best mobile credit card processor for small businesses. The mobile payment processing option has no monthly fees or startup fees, and the app is easy —none. You can wake up and run in no time with the free POS app while you wait for the free credit card reader to arrive. The app works offline, is compatible with Android and iOS, and has a competitive processing rate. In addition, POS software includes free business management tools. Access Square Square Monthly fee: free Swipe and chip processing fee: 2.6% + 10 cent Keyed-in and stored card processing fee: 3.5% + 15 cents Online and bill processing fee: 2.9% + 30 cents Card on file bill processing fee: 3.5% + 15 cents Swipe reader cost: free Chip and tap reader: \$49 Square Square \$299 Square Mobile Payment Feature: POS App: You can use the Square POS mobile app for free on both Android and iOS devices — even offline. With the app, you can also record other types of payments, split payments, accept gift cards, send invoices, and save cards on file (although they come with higher processing fees). Add ad space for faster billing, allowing customers to add tips and print, text, or email receipts. Accepted payment types: With Square's mobile credit card processor, you can accept major credit cards including Visa, Mastercard, Discover, and American Express as well as mobile options like Apple Pay, Android Pay, and Google Wallet. Depending on the reader, you can accept magstripe credit card, chip and contactless (NFC) payment. Payment time: One of our favorite things about Square is the deposit the next day. While some may take two days if a transaction occurs after normal business hours, it's still a fairly fast checkout time. For faster access to your cash, upgrade to instant transfers for a 1.5% fee. Business management tools: Square offers more than mobile credit card processing. It has features that help you run other areas of your business, like inventory management, appointment booking, employee management, ins invoice management, and email marketing. You can also integrate it with other tools and drag the report to include all the data. Multi-channel features: Although it's hard to compete with Shopify when it comes to e-commerce features, Square doesn't appear too short. You can pay online and send or manage invoices and set up payments periodically. Square offers its own POS machine and online store, and it also integrates with a number of third-party tools for both. PayPal: The best mobile credit card processor for inline sales PayPal used to be an online-only platform, but since then it has added direct payments, including the PayPal Here branded mobile credit card processor. While Square offers exchange plus price, PayPal has a simpler and more competitive price model - it's just a flat percentage, which usually works well for lower transaction values. Both platforms are simple and easy to set up and use. PayPal integrates with a variety of platforms and accepts a wide range of payment methods. It is also known for its powerful security features. Access PayPal PayPal Monthly fee price: \$0 Swipe and chip processing fee: 2.7% Keyed-in and stored card processing fee: 3.5% + 15 cents Online bill processing fee and bill: 2.7% Swipe reader cost: \$24.99 Chip and tap reader: \$79 PayPal Mobile billing feature: Payment time : If you use PayPal Here, you will receive money in your PayPal account immediately. You can keep there or transfer them to your bank account for free for one to two business days or immediately for an additional fee. Keep in mind that if you use a free magstripe reader or lock in more than \$500 in transactions over a seven-day period, your money is held for 30 days. If you handle anything close to opt for a chip reader (\$24.99) to avoid frozen funds. Mobile app feature: the PayPal Here app lacks some of the features Square has, but it has been expanded to include additional features such as inventory tracking and employee accounts. You can configure discount/discount/tax/tip settings, apply refunds, and send receipts via email. PayPal product categories are simplified so you can order items and prices, including item modification tools, variations, and add-ons. You can also send an invoice to a customer for payment at a later date. Accepted payment types: PayPal Here accepts all major credit and debit cards, including swipe, chip, and contactless payments—depending on the mobile reader you use. PayPal also accepts PayPal, ideal for event and mobile providers, where customers may not have a credit card on it. Like Square, PayPal can process payments offline, so you don't need an internet connection to process sales. Multi-PayPal is integrated with most major e-commerce platforms, so you can meet both direct and online trading. Intuit GoPayment: The best mobile credit card processor for QuickBooks users If you've set up and run on QuickBooks, Intuit GoPayment is an easy option for handling mobile credit cards, and it makes accounting books simple. And like Square PayPal, it's free to start with their mobile credit card processors. Its low processing fees make it ideal for high transaction values. Access Intuit GoPayment Intuit GoPayment Monthly price: \$0 Swipe and chip handling fee: 2.4% + 25 cents Keyed-in and stored card processing fee: 3.4% + 25 cents Bill processing fee: 2.9% + 25 cents Swipe reading cost: first free: \$19 each then Swipe, chip, and tap reader: \$49 Intuit GoPayment Mobile Payment Feature: Mobile App Features: While GoPayment allows you to build a product listing, its inventory tracking feature is quite limited—especially when compared to Shopify or even Square. You can also manually enter credit card information in the mobile app and pay without any additional readers or hardware. In the app, you can also configure sales taxes and tips and take credit card photos for contactless payments. Accepted payment types: Like most other mobile credit card processors, you can accept most major credit cards with GoPayment. You can also process ACH transfers, as well as record payments in cash and checks. Payment time: Intuit GoPayment offers payments the next day, although there may be delays on weekends and holidays. Multi-channel: Intuit GoPayment offers both online and in-person credit card transactions. Connect it e-commerce platform of your choice to start collecting payments online. It also relies on close integration with ShopKeep for its POS capabilities. Payment warehouse: The best mobile credit card processing for businesses established through the payment warehouse, businesses have to pay a monthly fee to access wholesale mobile credit card processing fees. Unlike other processors in this list, hey, Depot is a dedicated payment processor. Therefore, its security, reliability, setup and fees are attractive to merchants of all sizes, especially established. It is also easy to predict processing fees with its price model. Visit Payment Depot Payment Depot Monthly Fee: \$49 per month Swipe and chip processing fee: Interchange + 5 cents - 15 cents Keyed-in and stored card processing fee: Interchange + 5 cents - 1 SwipeSimple swipe cents and chip reader: \$99 SwipeSimple Terminal: \$425 Payment Depot uses a subscription-based model and also works with third-party hardware you can buy through Payment Depot or a other options. Payment Depot mobile payment feature: Payment Depot is really not a mobile credit card processor. Instead, they partnered with SwipeSimple for mobile payments and apps that work offline like Square and PayPal. With the SwipeSimple Mobile Payments app, you can add tips, save billing information, use product categories, and process returns. You can also view the analysis report. Accepted payment types: You can accept most major credit cards with Payment Depot, as well as contactless and mobile payments. Payment Payment Depot payment time is usually 24 -42 hours. Shopify: Best mobile credit card processor for online stores If you sell online outside your brick-and-mortar store, Shopify is one of the best mobile credit card processors out there. It combines all your sales channels into a single system, and has powerful features and options for inventory management, order implementation, POS, social commerce, and more. Unlike Square PayPal, Shopify comes with a significant monthly fee and cannot process payments while offline. Visit Shopify Shopify Prices below come with the Shopify Basic plan, which has a \$29 monthly fee. Processing rates are slightly lower with Shopify packages (\$79 per month) and Advanced Shopify (\$299 per month). Monthly fee: \$29 Direct payment processing fee: 2.7% Online payment processing fee: 2.9% + 30 cents Swipe and chip reading cost: \$29 Chip and tap reader: \$49 Shopify Retail Kit: \$229 Shopify Mobile Payment Feature: Omnichannel: Perhaps the biggest advantage for any Shopify user is the integrated retail and e-commerce sales channels. You can use the e-commerce website creator to launch an entire online store that complements your direct presence. This also includes multi-channel inventory management, shipping and implementation, third-party markets, and more. You can also accept gift cards purchased online or in person when using a mobile credit card processor. Mobile app feature: Shopify's mobile app offers a set of business management tools and options. However, you can't process payments offline. Accepted payment types: You can accept most major credit cards with Shopify, as well as gift cards, customer rewards, layaway payments, split payments and deposits. Payment period: Money arrives at your bank account in one to three days. On Square PayPal, Shopify lacks the payment option for the day. Business Management: Inventory management is Shopify's most powerful business management feature, but it also includes tools for reporting and analyzing, employee management, tips, email and SMS marketing, etc. There are also thousands of apps available, from customer-friendly programs to dropshipping. Bottom line Whether you're a brand new business starting with mobile credit card processing or an established store looking to take your business away, you need a cost-effective, reliable and easy-to-use solution. The best providers also do not have minimum transactions, fees or monthly contracts. Square is a great mobile credit card processing company for small businesses. Their plug-in and play solution makes it easy for people to accept payments anywhere, even offline. No application, startup fee or hardware cost means it's a risk-free investment. Plus, the Square app comes with the point-of-sale features you need to manage a business on the go. Visit Square to get started with a free account and mobile card reader. Visit Square Square
